

You Have The Power To Make A Difference

Imagine a hot summer afternoon. You come home. You get a cool drink. You turn on your air conditioner. Now imagine all of your neighbors doing the same thing. Electricity use soars.

Idaho Power's **A/C Cool Credit** program is a simple, effective way to shift energy consumption during the highest-use summer days, reducing the amount of electricity that must be generated now and in the future—which benefits everyone. For signing up, you'll get up to \$21 in bill credits.

Join over 25,000 Idaho Power customers who are already helping to reduce summer demand.

1-866-865-COOL (2665)

Join us today! For participating in June, July and August, you'll earn a \$7 credit on your July, August and September bills.

Find out more and sign up:

- online at www.idahopower.com/accoolcredit, or
- call 1-866-865-COOL (2665), or
- **return this form** with your Idaho Power bill payment.

When you sign up, a "Cool Switch" device is installed near your central air conditioning (A/C) unit. When system demands reach their peak, the switch cycles your A/C off for a short period each half hour — usually between 4 and 7 p.m. — while still keeping you comfortable. Most participants notice little or no difference in temperature. Installation is free and takes about 10 minutes. You don't even have to be home if your A/C is easily accessible.

Yes!

Enroll me in the A/C Cool Credit program. I have central a/c and want to join. (The Cool Switch does not work with evaporative (swamp) coolers or window units.)

1. How many central air conditioners do you have?

- 1 2 or more

2. Is your a/c unit accessible at all times?

- Yes No, I have a locked gate and/or a dog.

No thank you, please share this opportunity with another customer and remove my name from your mailing list.

If you are already participating, Thank you!
