

## *Have a more comfortable home year-round and get cash back!*

*Receive up to \$1,000 for an open loop water source heat pump and up to \$400 for an air source heat pump.*

If your home is electrically heated and you need to upgrade your heating and cooling system, you can get cash back from Idaho Power's Heating & Cooling Efficiency Program for the purchase and installation of an energy efficient heat pump.

Heat pumps:

- Help you feel more comfortable year-round as they heat **and** cool your home
- Can save you energy and cost less to operate

## How can I qualify for an energy efficient heat pump incentive?

You may qualify if you:

- Have an electric heating system (baseboard, electric furnace, ceiling or wall heaters, heat pump).
- Have oil or propane heating and your home is located in an area where natural gas is not available.
- Have your new qualifying heat pump installed by a Heating & Cooling Efficiency Program participating company according to program specifications.

For a list of participating companies and detailed information on program specifications, visit [www.idahopower.com/heatingcooling](http://www.idahopower.com/heatingcooling) or call 1-866-692-9176.
