

# Net Meter Application

Maximum Size: 25 kW Residential/100 kW Commercial

An IDACORP Company

This Net Metering application is an interconnection request for existing accounts to apply for Net Metering service under Idaho Power Company's Rate Schedule 84 within the States of Idaho and Oregon.

A completed application and application fee will initiate the process for Idaho Power to review the physical location and existing Idaho Power facilities to deliver the customer's excess energy (wind, solar, hydro, biomass and fuel cell technologies) from the customer meter. **Application and fee expire one year after approval to proceed.** For more information, go to <http://www.idahopower.com/netmetering>.

Idaho Power has submitted an application to the Idaho Public Utilities Commission to modify its net metering service (Schedule 84, Customer Energy Production Net Metering Service). If the company's application is approved as filed, residential and small general service customers in Idaho who complete their system and submit a System Verification Form on or before December 31, 2017 would take service under Schedule 84. Residential and small general service customers in Idaho who submit a System Verification Form on or after January 1, 2018 would take service under one of two new proposed schedules (Schedule 6, Residential Service On-Site Generation or Schedule 8, Small General Service On-Site Generation). To learn more, visit [idahopower.com/netmetering](http://idahopower.com/netmetering).

Once completed, please mail this form and the non-refundable \$100 application fee to:
